لجنة المعايير الإكاديمية و منسق البرنامج التوصيف بالبرنامج أ.د زينب عبدالعزيز قاسمي د. أحمد حمدان

#### **A-Basic information**

1. **Program Title:** Bachelor degree of Medicine and Surgery 2018-2019

2. Program Type: Single

**3. Department (s):** 33 departments (Integrated system)

N.	Department	N.	Department
1	Anatomy & Embryology	18	Tropical medicine
2	Histology	19	Dermatology & Venerology
3	Physiology	20	Clinical Pathology
4	Biochemistry	21	Radiology
5	Pathology	22	Pediatrics
6	Pharmacology	23	General Surgery
7	Microbiology & Immunology	24	Urology
8	Parasitology	25	Orthopedics
9	Ophthalmology	26	Cardio-thoracic Surgery
10	E.N.T	27	Neuro-surgery
11	Forensic medicine & Toxicology	28	Plastic Surgery
12	Community medicine	29	Oncology& Radiotherapy
13	Family medicine	30	Anaesthesia and Intensive Care
14	Internal medicine	31	Obstetrics&& Gynaecology
15	Psychiatry & Neurology	32	Physical medicine, rheumatology and rehabilitation
16	Chest	33	Emergency Medicine
17	Cardiovascular medicine		

4. Coordinator: Prof. Dr. Zeinab Kasemy

**5.** External Evaluator(s): Prof. Dr. Mona Ghaly

**6.** Date of Program specification approval: 8 -2018.

#### **B-Professional information**

#### I- Program Aims:

The program aims to provide graduate physicians who can:

- **a-** Provide primary health care as family physician/general practitioner, with emphasis on disease prevention and health promotion.
- **b-** Achieve the clinical and practical standards through a patient-centered care required to compete in the national labor market.
- **c-** Adhere to professionalism and adopt the ethics of medical practice and respect the religious, cultural and humanity values.
- **d-** Collaborate with other health care professionals, appreciating their role, respecting the hierarchy of the health care system with acquisition of the skills of professionalism and leadership.
- **e-** Continue self-learning and research to cope with the advancement in the medical field.
- **f-** Employ the clinical practice for the service and improvement of the community.

### **II- Academic Standards:**

The National Academic Reference Standards (NARS) for medicine approved by the National Authority for Quality Assurance and Accreditation of Education (2017) is used as the academic reference standards

The aims and Learning outcomes of the current program are comparable with the attributes of medical graduate (Annex 1) and competency areas provided by the national academic reference standards.

#### Competency areas & Key competencies of NARS 2017

#### Competency Area I: The graduate as a health care provider:

The graduate should provide quality, safe, patient-centered care, drawing upon his/her integrated knowledge and clinical skills, and adhering to professional values. The graduate should collect and interpret information, make clinical decisions, and carry outdiagnostic and therapeutic interventions - with an understanding of the limits of his/her expertise- considering the patient's circumstances and preferences as well as the availability of resources. The graduate should be able to:

- 1.1. Take and record a structured, patient centered history.
- 1.2. Adopt an empathic and holistic approach to the patients and their problems.
- 1.3. Assess the mental state of the patient.
- 1.4. Perform appropriately timed full physical examination of patients appropriate to the age, gender, and clinical presentation of the patient while being culturally sensitive.
- 1.5. Prioritize issues to be addressed in a patient encounter.

Select the appropriate investigations and interpret their results taking into consideration cost/effectiveness factors.

- 1.7. Recognize and respond to the complexity, uncertainty, and ambiguity inherent in medical practice.
- 1.8. Apply knowledge of the clinical and biomedical sciences relevant to the clinical problem at hand.
- 1.9. Retrieve, analyze, and evaluate relevant and current data from literature, using information technologies and library resources, inorder to help solve a clinical problem based on evidence (EBM).
- 1.10. Integrate the results of history, physical and laboratory test findings into a meaningful diagnostic formulation.
- 1.11. Perform diagnostic and intervention procedures2 in a skillful and safe manner, adapting to unanticipated findings or changing clinical circumstances.
- 1.12. Adopt strategies and apply measures that promote patient safety.
- 1.13. Establish patient-centered management plans in partnership with the patient, his/her family and other health professionals as appropriate, using Evidence Based Medicine in management decisions.
- 1.14. Respect patients' rights and involve them and /or their families/carers in management decisions.
- 1.15. Provide the appropriate care in cases of emergency, including cardio-pulmonary resuscitation, immediate life support measures and basic first aid procedures.
- 1.16. Apply the appropriate pharmacological and nonpharmacological approaches to alleviate pain and provide palliative care for seriously ill people, aiming to relieve their suffering and improve their quality of life.
- 1.17. Contribute to the care of patients and their families at the endof life, including management of symptoms, practical issues of lawand certification

#### Competency Area II: The graduate as a health promoter

The graduate should advocate for the development of community and individual measures which promote the state of well-being, he/she should empower individuals and communities to engage in healthy behaviors and put his/her knowledge and skills to prevent diseases, reduce deaths and promote quality lifestyle. The graduateshould be able to:

- 2.1 Identify the basic determinants of health and principles of health improvement.
- 2.2 Recognize the economic, psychological, social, and cultural factors that interfere with wellbeing.
- 2.3 Discuss the role of nutrition and physical activity in health.
- 2.4 Identify the major health risks in his/her community, including demographic, occupational and environmental risks, endemic diseases, and prevalent chronic diseases.
- 2.5 Describe the principles of disease prevention, and empower communities, specific groups or individuals by raising their awareness and building their capacity.
- 2.6 Recognize the epidemiology of common diseases within his/her community and apply the systematic approaches useful inreducing the incidence and prevalence of those diseases.
- 2.7 Provide care for specific groups including pregnant women, newborns and infants, adolescents and the elderly.
- 2.8 Identify vulnerable individuals that may be suffering from abuse or neglect and take the proper actions to safeguard their welfare.

2.9 Adopt suitable measures for infection control.

#### Competency Area III: The graduate as a professional

The graduate should adhere to the professional and ethical codes, standards of practice, and laws governing practice. The graduate should be able to:

- 3.1. Exhibit appropriate professional behaviors and relationships in all aspects of practice, demonstrating honesty, integrity, commitment, compassion, and respect.
- 3.2. Adhere to the professional standards and laws governing the practice and abide by the national code of ethics issued by the Egyptian Medical Syndicate.
- 3.3. Respect the different cultural beliefs and values in the community they serve.
- 3.4. Treat all patients equally, and avoid stigmatizing any categoryregardless of their social, cultural, ethnic backgrounds, or their disabilities.
- 3.5. Ensure confidentiality and privacy of patients' information.
- 3.6. Recognize basics of medico-legal aspects of practice, malpractice and avoid common medical errors.
- 3.7. Recognize and manage conflicts of interest.
- 3.8. Refer patients to appropriate health facility at the appropriate stage.
- 3.9. Identify and report any unprofessional and unethical behaviors or physical or mental conditions related to himself, colleagues or any other person that might jeopardize patients' safety.

Competency Area IV: The graduate as a scholar and scientist. The graduate should build his clinical practice on a base of the knowledge of scientific principles and methods of basic medical and social sciences, applying this knowledge into clinical care, and using it as a foundation for clinical reasoning, care provision, further professional development and research. The graduate should be able to:

- 4.1 Describe the normal structure of the body and its major organ systems and explain their functions.
- 4.2 Explain the molecular, biochemical, and cellular mechanisms that are important in maintaining the body's homeostasis.
- 4.3 Recognize and describe main developmental changes in humans and the effect of growth, development and aging on the individual and his family.
- 4.4 Explain normal human behavior and apply theoretical frameworks of psychology to interpret the varied responses of individuals, groups and societies to disease.
- 4.5 Identify various causes (genetic, developmental, metabolic, toxic, microbiologic, autoimmune, neoplastic, degenerative, and traumatic) of illness/disease and explain the ways in which they operate on the body (pathogenesis).
- 4.6 Describe altered structure and function of the body and its major organ systems that are seen in various diseases and conditions.
- 4.7 Describe drug actions: therapeutics and pharmacokinetics; sideeffects and interactions, including multiple treatments, long term conditions and non-prescribed medication; and effects on the population.

4.8 Demonstrate basic sciences specific practical skills and procedures relevant to future practice, recognizing their scientific basis, and interpret common diagnostic modalities, including imaging, electrocardiograms, laboratory assays, pathologic studies, and functional assessment tests.

# Competency Area V: The graduate as a member of the health team and a part of the health care system

The graduate should work and collaborate effectively with physicians and other colleagues in the health care professions, demonstrating an awareness of and a respect for their roles in delivering safe, effective patient- and population-centered care. He/she should be committed to his/her role as a part of health caresystem, respecting its hierarchy and rules and using his/her administrative and leadership skills to add value to the system. Thegraduate should be able to:

- 5.1 Recognize the important role played by other health careprofessions in patients' management.
- 5.2 Respect colleagues and other health care professionals and work cooperatively with them, negotiating overlapping and shared responsibilities and engaging in shared decision-making for effective patient management.
- 5.3 Implement strategies to promote understanding, manage differences, and resolve conflicts in a manner that supports collaborative work.
- 5.4 Apply leadership skills to enhance team functioning, the learning environment, and/or the health care delivery system.
- 5.5 Communicate effectively using a written health record, electronic medical record, or other digital technology.
- 5.6 Evaluate his/her work and that of others using constructive feedback.
- 5.7 Recognize own personal and professional limits and seek helpfrom colleagues and supervisors when necessary.
- 5.8 Apply fundamental knowledge of health economics to ensure the efficiency and effectiveness of the health care system.
- 5.9 Use health informatics to improve the quality of patient care.
- 5.10 Document clinical encounters in an accurate, complete, timely, and accessible manner, in compliance with regulatory and legal requirements.
- 5.11 Improve the health service provision by applying a process of continuous quality improvement.
- 5.12 Demonstrate accountability to patients, society, and the profession.

#### Competency Area VI: The graduate as a lifelong learner and researcher

The graduate should demonstrate a lifelong commitment to excellence in practice through continuous learning and professional development. He should reflect on his own performance, and plan for his own development making use of all possible learning resources. The graduate should have an inquisitive mind and adopt sound scientific research methodology to deal with practice uncertainty and knowledge gaps and to contribute to the development of his profession as well as for the purpose of his own academic development. The graduate should beable to:

6.1 Regularly reflect on and assess his/her performance using various performance indicators and information sources.

- 6.2 Develop, implement, monitor, and revise a personal learning plan to enhance professional practice
  - 6.3 Identify opportunities and use various resources for learning.
  - 6.4 Engage in inter-professional activities and collaborative learning to continuously improve personal practice and contribute to collective improvements in practice.
  - 6.5 Recognize practice uncertainty and knowledge gaps in clinical and other professional encounters and generate focused questions that address them.
  - 6.6 Effectively manage learning time and resources and set priorities.
  - 6.7 Demonstrate an understanding of the scientific principles of research including its ethical aspects and scholarly inquiry and Contribute to the work of a research study.
  - 6.8 Critically appraise research studies and scientific papers in terms of integrity, reliability, and applicability.
  - 6.9 Analyze and use numerical data including the use of basic statistical methods.
  - 6.10 Summarize and present to professional and lay audiences the findings of relevant research and scholarly inquiry.

#### **III- Program Learning Outcomes (PLOs)**

Competency Area 1: The graduate as a health care provider.

	Key competency	PLOs
1.1	,	1.1.1 List history-taking items.
	patient-centered history.	1.1.2 Define Efficient prioritized history taking.
		1.1.3 Describes the different components of history taking.
		1.1.4 Describe the secondary resources for patient encounters.
		1.1.5 Demonstrate customized efficient prioritized history-taking.
		1.1.6. Obtain data from secondary resources.
		1. 1.7. Demonstrate respect to the patient's rights
		during history taking.
		1.1.8. Apply the legal and ethical standards during history
		taking.
1.2	Adopt an empathic and holistic	1.2.1 Define empathic andholistic approaches in patient
	approach to the patients and their	care.
	problems.	1.2.2 Describe the patient's behaviorduring illness.
		1.2.3 Describe a patient's illness experience in the patient's
		own words according to the corresponding system.
		1.2.4 Demonstrate empathy in patient consultation.
		1.2.5 Demonstrate respect towards patient's emotions
		about illness.

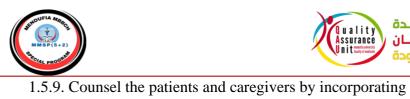

no fia Tacility of Med	Assess the mental state of the	1.3.1 Describe mental state assessment pillars.
Acci	patient.	1.3.2 Conduct a mental state assessment that is
		appropriately targeted to the patient's complaints and
		medical conditions
		1.3.3 Demonstrate respect and support toward mentally
		disordered patients.
1.4	Perform an appropriately timed	1.4.1 List physical examination components
	full physical examination of	1.4.2 Describe the disease finding (clinical manifestations)
	patients, appropriate to the age,	for the organ in the corresponding system.
	gender, and clinical presentation	1.4.3 Categorize different abnormalities of the organ in the
	of the patient while being	corresponding system and their role in disease
	culturally sensitive.	pathogenesis.
		1.4.4 Conduct general clinical examination concentrating
		on the systemic signs for the organ in the corresponding
		system-
		1.4.5 Perform local examination for the organ in the
		corresponding system-
		1.4.6 Generate differential diagnosis for acute
		presentations for the organ in the corresponding system-
		based on the examination findings.
		1.4.7 Demonstrate respect to the patient's rights during
		clinical examination.
		1.4.8 Apply the legal and ethical standards during clinical examination.
		1.4.9 Show professionalism while dealing with the patient.
1.5	Prioritize issues to be addressed in	1.5.1. Recognize situations with a need for urgent or
	a patient encounter.	emergent medical care, including life-threatening
	-	conditions.
		1.5.2. Recognize when to seek additional guidance.
		1.5.3. Demonstrates knowledge of care coordination.
		1.5.4. Describe the psychosocial factors related to the
		situation.
		1.5.5. Discuss the effect of the psychosocial factors on
		management plans.
		1.5.6. Develop a prioritized differential diagnosis for a
		patient's condition.
		1.5.7. Modify a differential diagnosis depending on
		emergent situations.
		1.5.8. Coordinates care of patients in routine clinical
		situations effectively utilizing the roles of the
		interprofessional team member

Ac	credified	the psychological element.
		1.5.10. Demonstrate respect to the psychosocial factors
		affecting the patient and his clinical condition
1.6	Select the appropriate investigations and interpret their results taking into consideration cost/ effectiveness factors.	<ol> <li>1.6.1. List the appropriate diagnostic investigations for common diseases of the system/organ</li> <li>1.6.2. Describe the basic interpretation of common diagnostic testing.</li> <li>1.6.3. Select the proper diagnostic test for the patient complaint taking into consideration the effectiveness factor.</li> <li>1.6.4. Interpret the findings of different diagnostic tests for a specific disease</li> <li>1.6.5. Demonstrate respect to the patient's socioeconomic standard during investigation selection.</li> </ol>
1.7	Recognize and respond to the complexity, uncertainty, and ambiguity inherent in medical practice.	<ul> <li>1.17.1 Define uncertainty, complexity, and ambiguity</li> <li>1.17.2 Identify the uncertainty, ambiguity, and complexity in different patient encounters.</li> <li>1.17.3 List the different causes of uncertainty and ambiguity in patient diagnosis.</li> <li>1.17.4 Outline the approach for dealing with uncertainty, ambiguity, and complexity.</li> <li>1.17.5 Provide a thorough differential diagnosis of a patient with an undifferentiated illness.</li> <li>1.17.6 Schedule a patient with a chronic illness for a return visit to continue the work-up Level.</li> <li>1.17.7 Demonstrate respect towards the opinions of other colleagues and senior staff regarding the assessment of patients with uncertain diagnoses.</li> <li>1.17.8 Show empathy toward a patient with uncertainty, ambiguity, or complexity in clinical diagnosis.</li> </ul>
1.8	Apply knowledge of the clinical and biomedical sciences relevant to the clinical problem at hand.	<ul> <li>1.15.1. Define clinical and biomedical sciences.</li> <li>1.15.2. Describe the different aspects of the clinical sciences relevant to the problem related to the current.</li> <li>1.15.3. 		dealing with cases of abuse or neglect.
2.9	Adopt suitable measures for	2.9.1. Define nosocomial infection.
	infection control.	2.9.2. Identify different sources of infection in a clinical
		setting.
		2.9.3. List infection control steps in different clinical
		situation.
		2.9.4. Apply different infection control measures in a
		clinical setting like hand washing.
		2.9.5. Manage a case of nosocomial infection.
		2.9.6. Show commitment to infection control regulations.

# Competency Area 3: The graduate as a professional.

	Key competency	PLOs
3.1	Exhibit appropriate professional behaviors and relationships in all aspects of practice, demonstrating honesty, integrity, commitment, compassion, and respect.	<ul> <li>3.1.1. Define professionalism.</li> <li>3.1.2. List the academic and professional behaviors in all aspects of the practice.</li> <li>3.1.3. Identify the principles of building appropriate academic and professional relationships.</li> <li>3.1.4. Presents him or herself in a respectful and professional manner.</li> <li>3.1.5. Demonstrate honesty, integrity, commitment, compassion, and respect in a patient encounter.</li> <li>3.1.6. Complete clinical, administrative, and curricular tasks on time.</li> <li>3.1.7. Dress and behave appropriately.</li> <li>3.1.8. Demonstrate appropriate professional relationships with patients, families, and staff</li> </ul>
3.2	Adhere to the professional standards and laws governing the practice, and abide by the national code of ethics issued by the Egyptian Medical Syndicate	<ul> <li>3.2.1. Identify the code of ethics issued by the Egyptian Medical Syndicate.</li> <li>3.2.2. Identify the laws governing the clinical practice.</li> <li>3.2.3. Decide the different law consequences to a given clinical situation.</li> <li>3.2.4. Apply the national code of ethics to curricular activities and different clinical situations.</li> <li>3.2.5. Demonstrate respect to the national code of ethics and laws in a patient encounter.</li> </ul>

n oufid raculty of M	Respect the different cultural	3.3.1. Identify the value of cultural differences.
A	beliefs and values in the community	3.3.2. Demonstrate respect towards community diversity
	they serve.	presented in case vignettes.
		3.3.3. Behave positively respecting different cultural
		beliefs and values in the community.
3.4	Treat all patients equally, and avoid	3.4.1. Identify the code of ethics regarding patient
	stigmatizing any category	equality
	regardless of their social, cultural or	3.4.2. Define stigmatized and different marginalized
	ethnic backgrounds, or their	patient groups in clinical settings.
	disabilities.	3.4.3. Point out the improper behavior in presented video
		or role play.
		3.4.4. Demonstrate equality while dealing with patients
		of different marginalized groups.
3.5	Ensure confidentiality and privacy	3.5.1. Define the code of ethics regarding patient
	of patients' information.	confidentiality.
		3.5.2. Identify the points of violation of patient
		confidentiality in a given case scenario.
		3.5.3. Demonstrate respect toward patient privacy.
3.6	Recognize basics of medico-legal	3.6.1 Identify the basics of legal responsibility for
	aspects of practice, malpractice and	medical errors.
	avoid common medical errors.	3.6.2 Outline the different medicolegal aspects of
		malpractice.
		3.6.3 Describe the common causes of medical errors and
		how to avoid them.
		3.6.4 Differentiate between different types of
		malpractice and medical errors.
		3.6.5 Document the presented health service for
		medicolegal aspects properly.
		3.6.6 Deal with patients according to the standards of
		clinical practice to avoid medical errors.
3.7	Recognize and manage conflicts of	3.7.1. Define conflict of interest
	interest.	3.7.2. Describe conflict of interest management
		3.7.3 Point out conflicts of interest in different
		situations.
		3.7.4 Demonstrate honesty by declaring a conflict of
2.0	D. 6	interest when present
3.8	Refer patients to the appropriate	3.8.1. Identify the hierarchy of the healthcare system in
	health facility at the appropriate	Egypt
	stage.	3.8.2. List the indications for patients' referral.
		3.8.3. Take the decision of patient referral when
		indicated.

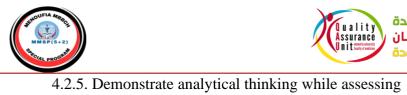

3.9	Identify and report any
	unprofessional and unethical
	behaviors or physical or mental
	conditions related to himself,
	colleagues, or any other person that
	might jeopardize patients' safety.

- 3.8.4. Deliver all available health care to the patients till referral.
- 3.9.1. Describe unethical behaviors that might endanger patient safety.
- 3.9.2. Identifies the appropriate channels to report unprofessional or unethical behavior.
- 3.9.3. Points out when to report unprofessional, unethical, or unsuitable behavior in presented videos or role play.
- 3.9.4. Exhibits self-awareness, self-management, social awareness, and relationship management.

## Competency Area 4: The graduate as a scholar and scientist.

	Competency		PLOs	
4.1	Describe the normal structure of the	4.1.1.	Describe the normal anatomy of the	
	body and its major organ systems	organ/system	related to the	
	and explain their functions.	4.1.2.	Identify the normal physiology of the	
		target organ a	nd systems involved in the disease.	
		4.1.3.	Describe the normal structure of	
		different tissues of the body.		
		4.1.4.	Discriminate between the different	
		normal anaton	nical landmarks.	
		4.1.5.	Interpret the relationship between	
		different phys	iological tests and organ functions.	
		4.1.6.	Relate the difference in tissue	
		structure to the	e difference in their function.	
		4.1.7. Integrate the anatomical,		
		physiological, and histological criteria of different		
		organs.		
		4.1.8.	Apply search methods to improve	
		basic knowled	lge.	
4.2	Explain the molecular, biochemical,	4.2.1. Describ	e the basics of the biochemistry	
	and cellular mechanisms that are	involved in di	fferent homeostasis processes in the	
	important in maintaining the body's	human body.		
	homeostasis.	4.2.2. Identify	the different homeostasis mechanisms	
		at the cellular	level.	
		4.2.3. Describ	e the molecular basis for the human	
		genome.		
		4.2.4. Relate n	molecular, biochemical, and cellular	
		homeostasis to	o functions of different body functions.	

culty of Medicine		1.2.3. Demonstrate analytical annixing while assessing
Accredited		different body functions.
4.3	Recognize and describe main	4.3.1. Describe the general process of
	developmental changes in humans	embryogenesis.
	and the effect of growth,	4.3.2. Identify the steps of embryological
	development and aging on the	development of the target organ/system.
	individual and his family.	4.3.3. Describe the developmental changes in the
		human life cycle.
		4.3.4. Identify the effect of growth and development
		on family dynamics.
		4.3.5. Outline the effect of aging on different body
		systems with consequent disease processes.
		4.3.6. Relate the difference in body structure and
		function to different age groups.
		4.3.7. Apply a patient-centered approach in patient
		encounters taking into consideration the family
		dynamics aspects.
		4.3.8. Demonstrate respect to the effect of growth
		and development on family dynamics
4.4	Explain normal human behavior	4.4.1. Explain the application of psychodynamic
	and apply theoretical frameworks	theories of human thought and behavior in describing
	of psychology to interpret the	and analyzing individuals, groups, or societies'
	varied responses of individuals,	behavior.
	groups and societies to disease.	4.4.2. Describe the basics of the human mind and
		behavior with various diseases.
		4.4.3. Interpret the different behaviors of patients and
		their families in response to different clinical settings.
		4.4.4. Adapt to different behaviors of patients and
		their families in different clinical situations.
4.5	Identify various causes (genetic,	4.5.1. Define the causative factors, risk factors, and
	developmental, metabolic, toxic,	precipitating factors for different disease processes.
	microbiologic, autoimmune,	4.5.2. Describe the etiopathogenesis of common
	neoplastic, degenerative, and	diseases of the specified system/ and its emergent
	traumatic) of illness/disease and	conditions.
	explain the ways in which they	4.5.3. Analyze different case scenarios to reach the
	operate on the body (pathogenesis).	underlying etiology.
		4.5.4. Show analytical thinking while analyzing
		different clinical situations.
4.6	Describe altered structure and	4.6.1. Compare different abnormalities of the body
	function of the body and its major	structure about their role in disease pathogenesis.

organ systems that are seen in various diseases and conditions.

- 4.6.2. Outline different abnormalities of the function of different body systems concerning the development of various diseases.
- 4.6.3. Integrate the structural abnormalities with the clinical presentations of different diseases.
- 4.6.4. Relate the disorders in organ functions to the disease process.
- 4.6.5. Value the holistic approach in the management of different clinical problems.
- 4.7 Describe drug actions: therapeutics and pharmacokinetics; side effects and interactions, including multiple treatments, long term conditions and non- prescribed medication; and effects on the population.
- 4.7.1. Describe the pharmacokinetics and pharmacodynamics of different drug families
- 4.7.2. Define the indications and contraindications for the main medications involved in the current.
- 4.7.3. List the adverse effects and drug-drug interactions for a certain medication.
- 4.7.4. Define different types of medication abuse and its hazards on the individual and society.
- 4.7.5. Select the proper drug according to the clinical situation.
- 4.7.6. Combine different drugs respecting their mechanism of action and drug-drug interaction.
- 4.7.7. Demonstrate rational drug use while prescribing medications respecting patient contextual factors.
- 4.7.8. Guard against medication abuse while prescribing treatment for different clinical situations.
- 4.8 Demonstrate basic sciences-specific practical skills and procedures relevant to future practice, recognizing their scientific basis, and interpret common diagnostic modalities, including imaging, electrocardiograms, laboratory assays, pathologic studies, and functional assessment tests.
- 4.8.1. Identify the principles of basic science practical tests for structure identification like gross and microscopic examination.
- 4.8.2. Identify the principles of tests of body physiology and biochemical reactions.
- 4.8.3. Describe different findings of different laboratory tests relevant to the
- 4.8.4. Discuss different findings of imaging studies relevant to the disease
- 4.8.5. Identify the pathological findings of different diseases.
- 4.8.6. List different functional tests for the organ /system included in the disease and their findings Practice basic science practical skills.
- 4.8.7. Relate the findings of basic science practical tests to clinical practice.

- 4.8.8. Interpret the different findings of investigations ordered for the patient.
- 4.8.9. Collaborate with other healthcare providers to reach a diagnosis.

# Competency Area 5: The graduate as a member of the health team and part of the health care system.

	Competency	PLOs
5.1	Recognize the important role	5.1.1 Define health care team.
	played by other healthcare	5.1.2 Describe the role of the health care team in patients'
	professionals in patient'	management.
	management.	5.1.3 Practice teamwork in role play for different clinical
		situations.
		5.1.4 Collaborate with other healthcare team members.
		5.1.5 Demonstrate respect toward other healthcare
		colleagues
5.2	Respect colleagues and other	5.2.1 Define overlapping and shared
	health care professionals and	responsibilities of the health care team in effective patient
	work cooperatively with them,	management.
	negotiating overlapping and	5.2.2 Identify the role of every healthcare team
	shared responsibilities and	member in the process of decision-making.
	engaging in shared decision-	5.2.3 Practice collaborative decision-making in
	making for effective patient	simulated scenarios for different clinical presentations.  5.2.4 Collaborate with other healthcare team
	management.	members
		5.2.5 Demonstrate respect towards each member
		of the healthcare team
		5.2.6 Demonstrate respect towards the
		professionalism of other colleagues
5.3	Implement strategies to	5.3.1 Outline different causes for conflict in health team
	promote understanding,	practice.
	manage differences, and	5.3.2 Identify different strategies for conflict management
	resolve conflicts in a manner	in health care provision.
	that supports collaborative	5.3.3 Practice conflict management in adopted role-play
	work.	scenarios.
		5.3.4 Communicate effectively with other colleagues to
		resolve conflict and overcome differences in opinions.
		5.3.5 Demonstrate respect to the solution for the conflict in
		favor of collaborative teamwork and patient care

Foculty of Medicine	Apply leadership skills to	5.4.1 Identify different leadership styles
Accredited	enhance team functioning, the	5.4.2 Identify the criteria of a successful leader
	learning environment, and/or	5.4.3 Describe different strategies to deal with different
	the health care delivery system.	obstacles encountered by leadership.
		5.4.4 Practice leadership skills in simulated scenarios for
		different clinical situations.
		5.4.5 Demonstrate respect and appreciation while dealing
		with juniors and other healthcare team members while being
		a leader
		5.4.6 Apply practices for continuous improvement of the
		work environment while being a leader.
5.5	Communicate effectively using	5.5.1 List the components of a health record.
	written health records,	5.5.2 Identify different types of health records and describe
	electronic medical records, or	their pros and cons
	other digital technology.	5.5.3 List the advantages of digital technology in health
		data.
		5.5.4 Practice written health record writing.
		5.5.5 Criticize the electronic data recording system
		effectively.
		5.5.6 Demonstrate honesty and accuracy while recording
		and presenting health data.
		5.5.7 Demonstrate respect to using medical records in
		patient encounters
5.6	Evaluate his / her work and that	5.6.1 Define constructive feedback
	of others using constructive	5.6.2. Discuss the value of constructive feedback.
	feedback	5.6.3 Practice constructive feedback in simulated scenarios.
		5.6.4 Demonstrate respect to the given feedback in a
		professional and effective way
5.7	•	5.7.1. Identify when to seek personal and professional help
	professional limits and seek	in patient encounters.
	help from colleagues and	5.7.2. Outline different types of limitations in patient
	supervisors when necessary.	encounters and how to deal with them
		5.7.3. Point out different limitations in a given role-play
		5.7.4. Identify the indications for counseling in a given case
		scenario.
		5.7.5. Apply patient-centered care despite the presence of
		personal limitations Consistently demonstrate compassion,
<b>5</b> 0	Apply fundamental law and d	respect, and empathy
5.8	Apply fundamental knowledge	5.8.1 Discuss the basic health economics.
	of health economics to ensure	5.8.2 Define the efficiency and effectiveness of the
		healthcare system

Foculty of Medicine Accredited	the efficiency and effectiveness of the health care system.	5.8.3 Outline different approaches to improve the healthcare system taking into consideration the efficacy and
		effectiveness.
		5.8.4 Analyze different work situations to define the points
		of strengths and weaknesses.
		5.8.5 Demonstrate accuracy and analytical thinking in
		different situations
		5.8.6 Formulate an approach to improve the efficacy of a
		healthcare system
5.9	Use health informatics to	5.9.1 Define health informatics.
	improve the quality of patient	5.9.2 List different types of health informatics.
	care.	5.9.3 Differentiate between different types of data according
		to source and usage.
		5.9.4 Apply honesty and accuracy while providing medical
		care.
5.10	Document clinical encounters	5.10.1 Identify the regulations that govern clinical data
	in an accurate, complete,	documentation
	timely, and accessible manner,	5.10.2 Define the legal responsibility of the clinician
	in compliance with regulatory	regarding clinical documentation.
	and legal requirements.	5.10.3 Practice different forms of clinical documentation.
		5.10.4 Demonstrate honesty and accuracy while dealing with
		clinical data
5.11	Improve the health service	5.11.1 Identify the standards of quality in a clinical setting
	provision by applying a process	5.11.2 Formulate a plan for quality improvement in a clinical
	of continuous quality	setting
	improvement	5.11.3 Demonstrate accountability to patients, society, and the
		profession.
5.12	Show commitment toward	5.12.1 Define the role of the physician toward patients,
	continuous improvement of	society, and the profession.
	quality in the clinical setting.	5.12.2 Define accountability in inpatient encounters.
		5.12.3 Identify the points of dereliction in simulated clinical
		situations.
		5.12.4 Show commitment towards different roles of the
		clinician.

# Competency Area 6: The graduate as a lifelong learner and researcher.

	Competency		PLOs
6.1	Regularly reflect on and assess his	6.1.1	List the main performance indicators

# V- Curriculum Structure and Contents

• <u>4.a- Program duration (years)</u>: 5 years(10 terms) + Pre-Registration House Officer (PRHO) two training year.

#### 4.b- Program structure:

- 1- First stage (pre-clinical stage) (5 terms)
- 2- second stage (Clinical stage) (5terms)

Academic year		N	No. of study hours		Number of study	Total credit	Total marks
		Theoretical	Practical	Activities	weeks/term	hour / term	/term
First stage	•						
Level 1*	Term 1	129	171	342	16	21.5	475
	Term 2	111	144	297	16	19.5	425
Level 2	Term 1	108	162	324	16	21.5	500
	Term 2	114	171	342	16	20.5	475
Level 3	Term 1	96	144	288	16	18.5	525
Second sta	ige :						
Level 3	Term 2	114	171	342	16	20.5	475
Level 4	Term 1	114	171	342	16	21.5	500
	Term 2	120	180	360	16	21.5	500
Level 5	Term 1	102	153	306	16	19.5	450
	Term 2	114	171	342	16	20.5	475
	Total for fin	rst stage				101.5	2400
	Total for se	cond stage				103.5	2400
	Percentage of total first stage / total program					49.5%	50%
	Percentage	of total second	stage / total p	rogram		50.5%	50%

#### Modules contributing to the program:

#### 1- Compulsory modules (181 credit hours)

Compulsory modules (foundation; muscloskletal1,2; blood &lymphatic; cardiovascular; respiratory; nutrition, gastrointestinal; renal &urinary; reproductive & breast; Endocrine; CNS &special sense1,2; basic medical examination; dermatology, community; primary health care and elderly; child health; investigations; oncology; heart & chest; clinical pathology; endocrinology & breast; hematology and lymphatics; Obstetric; renal, urinary diseases and andrology; Gynecology; family medicine; Gastroenterology, hepatology & infectious disease; psychiatry & neurological diseases; ear, nose and throat; pediatric surgery & plastic surgery; ophthalmology; emergency & critical care; vascular surgery; orthopedic& rheumatology; forensic & toxicology.

#### 2- Longitudinal Modules (7 credit hours):

Behavioral and Human Sciences, Medical professionalism and communication; evidence-based medicine basic medical research and biostatistics; basic life support; ethical &legal issues in medical practice; patient safety & infection control, and Clinical psychology.

## **3- Elective Modules (10 credit hours )**

	Medical :	Non Medical :	
1	Medical Engineering	- Painting	1
2	Stem cells	Graphics and Photography	2
3	Biomedical genetics	Music	3
4	Molecular Biology	Computer and Programming	4
		languages	
5	Advanced Life Support	Clothes design and fashion	5
6	Tissue culture (Pharmacology	Digital and social media	6
	Department)		
7	Experimental Animal Model	History of medicine	7
	(Pharmacology Department)	·	
8	Echo / Sonar	Training of trainers (TOT)	8
9	Parental nutrition	Financial management	9
10	Surgical intensive care	Strategic marketing	10
11	Complementary and alternative	Medical informatics (Healthcare	11
	medicine	IT)	
12	Hospital Administration	Languages (English – Germany –	12
		France)	
13	Hospital Management for health	Translation	13
	professionals		
14	Emergency and critical care	Health Economics	14
4 =	medicine	DI :	1.5
15	Disaster management for health	Physics	15
16	professionals	TI-althouse markets	1.0
16	Application of computer programs in medical field	Health care quality	16
	III medicai neid	Philosophy	17
		Art (Portrait – glass – wood burn	18
		graffiti)	10
		Handmade works	19
		Cooking	20
		Acting and theatre	21
		Calligraphy	22
		Leadership and project	23
		management	-

noufia Fc culty of Medicine	Time management	24	
ALCHRUNG	- Creativity and mind mapping	25	
	Human Resources	26	
	- Public Relations	27	

# 4- Modules for University/ faculty requirements (2 credit hours)

Module code	Module title	Credit hours (Lecture)	Total
- UN 01	Human rights	1	1
- EN 02	Quality	1	1
	entrance		

# 5- Ten vertical Integration modules (10 modules/ 5 credit hours)

# Total credit hours for the program 205 credit hours as follow:

Courses and M	Modules	First stage	Second stage	total
Compulsory Courses and Modules	Courses &integrated Modules	88	93	181
Wiodules	Longitudinal Modules	4	3	7
Elective Modu	iles	5	5	10

#### V- Module Specification (Annex 2)

#### **Competencies - Modules Matrix (Annex 3)**

#### **Program Learning Outcomes – Modules Matrix** (Annex 4)

#### VI-Program admission requirements

Registration to the faculty of medicine requires the student to have the Egyptian general secondary education certificate or equivalent certificates or degrees approved by the Egyptian ministry of higher education with qualifying grades according to the guidelines put annually by the ministry of higher education.

#### VII- Regulations for progression and program completion:

# The regulations for student progression are as follows:

The student should achieve at least 40% of the written exam of the module or the course, and 60% of the total marks of the module to pass the module.

Progression Level	Condition
Progression to Second level	Failing in less than 11 credit hours of the total credit hours with
	marks considered in the GPA
<b>Progression to Third Level</b>	Failing in less than 14 credit hours of the total credit hours with
	marks considered in the GPA
Progression to Fourth level	Failing in less than 10 credit hours of the total credit hours with
	marks considered in the GPA
Progression to Fifth Level	Failing in less than 13 credit hours of the total credit hours with
	marks considered in the GPA

To complete the program, the student should pass all the modules within the programs whether their marks are considered in the GPA or not.

#### VIII-Teaching and learning methods:

The teaching and learning in Menoufia Faculty of Medicine follows a strategy written in a code of good practice for effective teaching and learning.

### **Theoretical teaching:**

- Interactive lectures
- The lecturers are conducted using:
  - a. Brain storming
  - b. Case based learning
  - c. Audiovisual aids through animations and diagrams
  - d. Interaction with the students through questions
  - e. Student engagement with discussion
  - f. Team based learning

<u>Practical Teaching:</u> using equipped laboratories with anatomy specimens, microscopes, and different tools for practical training

#### **Clinical Teaching: conducted using:**

- a) Clinical rounds
- b) Simulated patients
- c) Web based video and Multimedia applications
- d) Problem solving
- e) Skill lab

**Field training:** through field visits organized by the department of public health in its related modules, and hospital visits in some clinical modules.

#### IX- Student Assessment methods:

#### A. Attendance criteria:

The minimum acceptable attendance is 75%, otherwise students failing toreach that percentage will be prevented from attending the final examination.

#### **B.** Types of Assessment:

- **Formative:** This form of assessment is designed to help the students to identify areas for improvement. It includes a multiple-choice questions, problems-solving exercises and independent learning activities in all subjects. These will be given during tutorial and practical sessions. The Answers are presented and discussed immediately with you after the assessment. The results will be made available to the students.
- **Summative** This type of assessment is used for judgment or decisions to be made about the students' performance. It serves as:
  - 1. Verification of achievement for the student satisfying requirement
  - 2. Motivation of the student to maintain or improve performance
  - 3. Certification of performance
  - 4. Grades

#### **C- Assessment Tools:**

Evaluation of Students level of performance is achieved by observation of rating scales and by applying variable types of tests as follows:

#### I. Assessment of cognitive skills is achieved by a written exam including:

- Questions recalling knowledge in the form of:
  - Short essay questions.
  - Multiple choice questions
  - Extended Matching questions
  - Short-answer questions
- Interpretation of specific data: by
  - o Problem solving questions: though setting short, questions preceded by case history
  - o Case Based multiple choice questions and extended matching questions.

#### II. Assessment of psychomotor skills through setting:

- Evaluation of student activities
- Objective Structured Practical exams (OSPE).

Objective Structured Clinical cases exams (OSCE).

#### III. Assessment of affective skills:

Through evaluation of presentations and observation of different student activities including role play, specially prepared stations in OSCE examinations

### D- Summative Assessment methods, their weight and schedule:

<b>Assessment Method</b>	Percentage	Description	Timing
Regular Evaluation	30%	10% written at the end of and periodicals including problem-solving, multiple-choice questions, give reason, matching, extended matching, complete and compare.	At the end of the module
		20% Participation in the tutorials, TBL, Research.	During the module
Final practical exam	30%	OSPE/ISCE Exam	At the end of the module
Final Written	40%	It Includes problem-solving, multiple-choice questions, give a reason, matching, extended matching, complete and compare.	At the end of the semester

#### **D- Grading by GPA System:**

<b>%</b>	Grade	Grade Points per credit	
90 - 100	A	3.5 - 4.00	Excellent
85 - 90		3.25 - 3.5	
75 - 85	В	2.75 - 3.25	Very good
65 – 75	С	2.25 - 2.75	Good
60 – 65	D	2.00 - 2.25	Pass
< 60	F	0.00	Failed
Withdraw	W	Incomplete	IC

## X- Evaluation of program Learning Outcomes of the Module

The acquisition of program PLOs would be evaluated as shown in the following table.

Evaluator	Tool	Sample
1- Senior students	-Questionnaires -Review of assessment Methods -Review of examination results	Students in the last year
2- Alumni	-Questionnaires - Group discussions	Recently graduated within 5 years
3- Stakeholders	-Questionnaires - Focus group discussions	1-Directors of ministry of health and population Hospitals, medical Insurance. 2-Adminstrative staff in the Ministry of health (hospital)
4-External Evaluator(s) (External Examiner(s))	-Reports	External examiners in  Each Module
5- Other (academic leaders of the faculty)	-Questionnaires - focus group discussions	Dean, Vise deans, directors of faculty Hospitals, heads of departments

# Academic Reference Standards (NARS 2017) Program aims Matrix

National Academic Reference Standards (Attributes of Medical Graduates)	M.B.B.CH. program (5+2 credit hours) aims
Work to maintain health and promote human well-being.	Provide primary health care as family physician/general practitioner, with emphasis on disease prevention and health promotion.
Behave professionally and adhere to medical ethics.	Adhere to professionalism and adopt the ethics of medical practice and respect the religious, cultural and humanity values.
Provide -quality and safe patient-centered care, focusing on primary health care and dealing with common health problems in his/her community.	Achieve the clinical and practical standards through a patient-centered care required to compete in the national labor market.
Value the importance of a good doctor/ patient relationship, and work to establish and maintain it.	Achieve the clinical and practical standards through a patient-centered care required to compete in the national labor market.
Work effectively with other health care professionals respecting their roles and their contribution to the team.	Collaborate with other health care professionals, appreciating their role, respecting the hierarchy of the health care system with acquisition of the skills of professionalism and leadership.
Contribute to the development and empowerment of his/her community.	Employ the clinical practice for the service and improvement of the community.
Work as a lifelong learner- on his/her own continuous professional development, including being equipped to engage in post-graduate and research studies.	Continue self-learning and research to cope with the advancement in the medical field.
